

# Rossmond Ralph Q. Rivas

## Education

---

- **B.Sc. Computer Science**, Mapúa Malayan Colleges Laguna, Philippines. *Expected October 2025*

## Work Experience

---

|                                 |                                                   |                           |
|---------------------------------|---------------------------------------------------|---------------------------|
| <b>Junior Software Engineer</b> | <b>iNeed Solution Inc.</b><br>Makati, Philippines | <b>Apr 2025–July 2025</b> |
|---------------------------------|---------------------------------------------------|---------------------------|

- Built and deployed a cross-cutting logging service integrated across multiple modules, improving system observability and debugging efficiency.
- Designed and implemented JWT authentication and an OTP service, strengthening API security.
- Automated recurring tasks using Task Scheduler and deployed APIs via IIS.
- Collaborated with cross-functional teams to ensure seamless integration of services.
- Tech stack: C#, Flutter, MongoDB.

## Skills

---

- Languages: C#, Dart, Python, Lua, Ruby, C, PHP
- Frameworks: Flutter, ASP.NET, Ruby on Rails
- Databases: MySQL, MongoDB
- Tools: Git, PowerShell, Bash, Windows, Linux
- Classes: Software Engineering, Data Structures, Algorithm Design, Database Management Systems
- Certificates: Introduction to NoSQL, Introduction to Cryptography, Employability Skills - JobReady

## Projects

---

### Parking Reservation System Logger

- Developed backend logging API to monitor and track parking events across modules.
- Improved system reliability and inter-team collaboration by ensuring compatibility with multiple modules.
- Tech stack: C#, Flutter, MongoDB.

### Istorya Adventure

- Designed and developed a game-based learning mobile app teaching Philippine history via roguelike and bullet-hell gameplay.
- Implemented features such as level replayability and a leaderboard to drive student engagement.
- Built with Unity (C#).

### Book-A-Seat

- Contributed to frontend of a seat reservation system enabling students to scan QR codes for instant booking.
- Developed a digital seat management tool for admins to replicate and rearrange physical seat layouts.
- Tech stack: HTML, CSS, JavaScript.
